

SPECIFICATION AMENDMENT

Please add the paragraph below at the end of the last paragraph on page 6 of the specification, just before the claims, as discussed in the Examiner Interview:

In the following claims, when discussing a canard having two and only two significant lifting surfaces, with a smaller lifting surface in front of a larger lifting surface, it should be understood that the smaller lifting surface is usually and frequently referred to as a “canard surface.” The larger lifting surface is usually and frequently referred to as a “wing.”

Please add after the paragraph under Brief Description of the Drawings, the following:

Figures 3 and 4 illustrate canards with two engines, each mounted on a wing. Figures 3 illustrate tractor engines and Figures 4 illustrate pusher engines.

Please add on page 6, before the current last paragraph, the following paragraph:

Figures 3 and 4 illustrate a pair of engines 26 located on wing 14.
